

INSTALLATION

'Pads' requires Kontakt 5.1 (or higher).

Unzip the Pads zip file that you've downloaded and transfer the Pads v1.x.x folder to a location you wish on your hard drive.

Open the 'Instruments' folder, which is in the folder Pads v1.x.x you've just moved to your hard drive and double click on an NKI in one of the instrument folders.

USING WITH THE FREE KONTAKT PLAYER

You CAN use this library with the free Kontakt Player and it will play and work perfectly but with the following restrictions:

There is a time limit. This varies according to the version of the Player you have.

You can edit the sounds to your requirements exactly as though you have a full working copy of Kontakt but you cannot save any edits or tweaks you make.

When the Player times out, you can restart it immediately and continue (although you will, of course, have to reload everything).

To use this library to its full potential, it is recommended you buy a full version of it, Kontakt 5 or higher.
