LEVIATHAN

Thank you for purchasing LEVIATHAN by ImagikSound, an ambient and drone machine very easy to use. Though its complex multifunctional controls under the skin, the users just need to handle very few knobs on the GUI, that allows a very fast and simple sound creation. A random feature adds more speed to the new sound creation. As you can see in this manual, the GUI is very simple to learn. You can save and load the presets you will create that will be stored inside the Data subfolder. There's an automatic memory purging system about the samples loading to avoid the RAM overloading, that's because the huge amount (over 60 seconds and more) of some samples.

System Requirements

This library requires Native Instruments Kontakt Full version 6.5.3 or later. The sample files are compressed to lossless in 96kHz and 24bit NCW audio format. Please read all instrument specs and software requirements before purchasing an ImagikSound product. Many instrument presets in this library are extremely system and CPU resource intensive. We highly recommend that you have at least 4GB of system ram, a multi-core cpu and an 7200 rpm SATA or SSD hard disk before purchasing this particular ImagikSound library. Large sample sets like those found in this library and a massive amount of effect parameters may load slowly and may cause system instability on the computers and to the DAW. You must have at least Windows version 7 or later, or Apple OSX 10.10 or later.
