INSTALLATION

LICHO is a sample library created for Spectrasonics Omnisphere 2.86c or newer.

To install LICHO run Omnisphere 2.86c in standalone mode or as a plugin in your DAW.

Step 1

Place mouse cursor over patch name and press right mouse button. Next, chose "Install omnisphere" from menu.

INSTALLATION

Step 2

Confirm by pressing "Continue"

Step 3

Browse library file with "omnisphere" extension and press "Open". This will initiate unpacking and coping samples and patches into your Omnisphere "STEAM" folder. It may take a minute. After it's done you will find "Sonic Atoms" patches and sound sources in Omnisphere's browser.
