01 // WELCOME TO THE GRID

IMMERSIVE FUSION: FLESH, SILICON AND SOUL.

Thank you for choosing CyberneticA. By acquiring this library, you are not merely buying sounds; you are embarking on a sonic journey. We are deeply grateful for your support and for letting our sounds become part of your creative universe.

CyberneticA is a vibrant tribute to Cybernetic universes. This unique sonic expression is inspired by the philosophical-spiritual depth of The Matrix trilogy and The Animatrix.

The main theme explores the complex relationship between humans and machines; between Creators and their creations. It delves into the unsettling possibility that we are living within a matrix without knowing it—and that, like Neo, we must find a way to break free. It is a call to rediscover our true identity: not merely cogs in a machine, not only small mortal humans, but beings from the stars and from the divine creation.

THERE IS NO SPOON...

02 // SONIC IDENTITY

INSPIRATIONS & HORIZONS

The library also draws energy from diverse futuristic horizons—from the grit of *Arc Raiders* to the neon of *Cyberpunk 2077*, and the machine-driven world of *Alita: Battle Angel*.

Musically, it celebrates alternative and synthetic cultures, forging a sonic identity through the lens of **iconic Film and Video Game soundtracks**. It resonates with the dark electronic pulses of **Front 242**, the industrial weight of **Nine Inch Nails**, the raw power of **Rammstein**, the complex synthetic textures of **Skinny Puppy**, and the aggressive, modern cinematic energy of **Junkie XL**.
