

BIGGIFIER

By Aden

Biggifier by Aden is a powerful one-knob that delivers an instant and addictive shot to the metaphorical arm of any sound. Jack up that wimpy kick, beef up the faintest of vocals and juice any flaccid sample into a BIG, fat, room-filling sound. Don't be afraid to keep cranking up that knob until you hit maximum Bigness. The fact that it's so insanely simple and quick to use and the quality of the output so high, across a range of modes, makes this a must have tool for both the most seasoned producers out there, as well as those just starting to explore sound design and production.

BIGNESS

Makes everything bigger!

LENGTH

Adjust the length of all that extra bigness.

MODES

Choose one of the five Biggifier modes: Biggifier, Biggifyre, Biggichoir, Biggidriver or Biggiverb.

MIX

The mix feature acts as a mix control between the unprocessed and the biggified signal.

INPUT

Adjust the input volume to taste, or boost it to push the signal into the build-in safety limiter.

OUTPUT

The output feature allows you to control the output volume of the Biggifier.
