

HEAT 2

HEAT 2 is a saturation/distortion unit with ten different types of saturation/distortion that you can blend to your taste.

DRIVE: There are ten different types of saturation/distortion that you can select.

BLEND: Blend the selected saturations/distortions to your taste.

FILTER: A low and a high pass filter to filter out the unwanted frequencies in the two selected saturation/distortion types.

MAKEUP: Adjust the volume of the different saturation/distortion types separately.

MIX: The mix feature in the middle acts as a common mix control for the whole plugin. This allows for parallel usage.

IN & OUT: The input and output sliders allow you to control the input and the output volume of the plugin.

LOGO: The HEAT logo acts as a bypass control for the whole plugin, and is smoothed to be click and pop free for unhindered A/B testing.

PRESET MENU: Select a preset.
