

VOCAL LIMITER

The Vocal Limiter is exactly what the name suggests: a limiter that's specifically tailored for vocal tracks. Make them loud, and give them that last little extra push to cut through the mix. The Vocal Limiter features a build-in autogain to keep the volume of your vocals constant.

LOGO:

The Vocal Limiter logo acts as a bypass control for the whole plugin, and is smoothed to be click and pop free for unhindered A/B testing.

THRESHOLD:

The main feature of this simple plugin is the big threshold slider. Pull it down to start limiting.

AUTO-RELEASE:

Select one of the three autorelease options. Ultra Slow (good for synths), Slow, Medium or Fast.

VOLUME SLIDERS:

Control the volume of the incoming and/or outgoing signal.
